**Delivering Value Through
Engineering Excellence...**

The Foundation of Our Business

Management Philosophy of Field International Group

We aim to exceed the expectations of stakeholders and communities through the pursuit of our corporate vision and mission, acting in accordance with our values which form the foundation of our business decisions.

VISION

Build better futures by overcoming the most complex, profound challenges, everywhere.

MISSION

We aspire to be the leading team, with consistent commitment towards tomorrow's demand in Aerospace and Defence. We take pride in the high level of services and solutions we provide to all our customers across all sectors.

Safety & Quality

We are committed to the highest standards of safety and quality in everything we do.

Collaboration

We enable our people to work seamlessly across geographies and functions towards mission accomplishments.

Customer Focus

We are committed to listen to our customers needs and strive to achieve customer experience excellence.

Support our People

We embrace diversity, develop and retain our people with competences to create new value.

Build an organization with Integrity

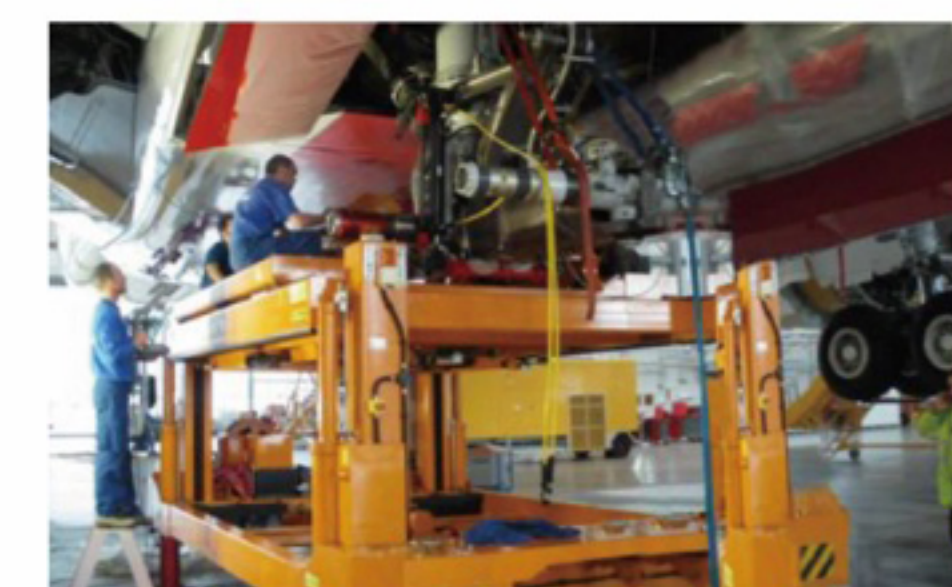

We are uncompromising in our ethical behavior and protecting our company culture, which foster trustworthiness with one another, our customers, suppliers and strategic partners.

Intellectual Property Tooling Airbus TEM Approved

► FIL 8400

FIL 8400 is the only Airbus approved A380 landing gear removal / installation tool.

► FIL 8100

FIL 8100 is the only Airbus approved A330-A340 landing gear removal/installation tool.

► FIL 3300 – Oil Migration Tool

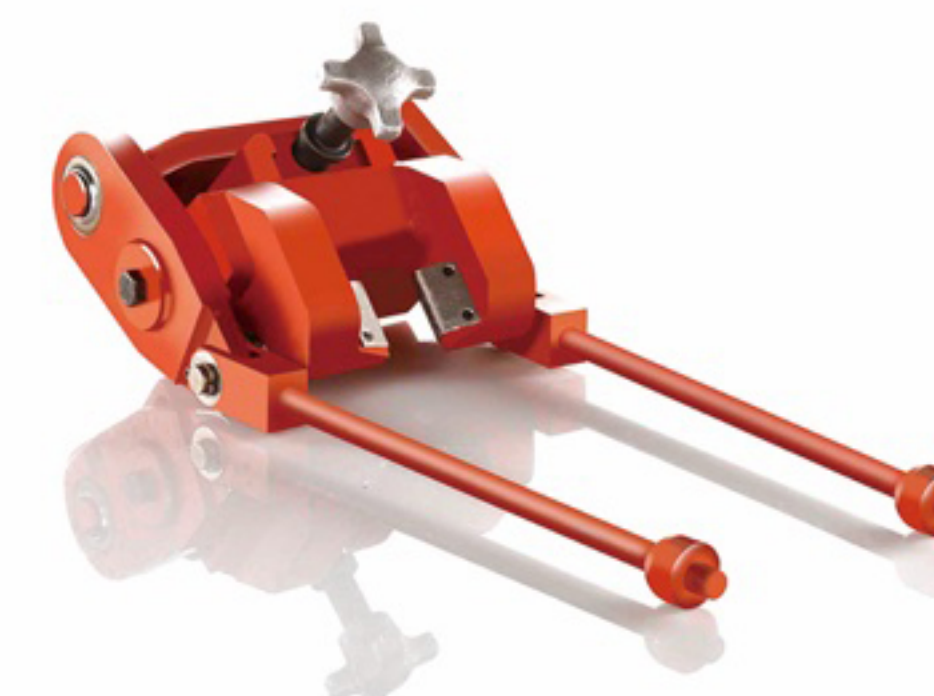

Designed and developed following a request by Airbus. The tool measures the amount of oil leakage through the landing gear seals, enabling maintenance organisations to accurately determine when the landing gear oil seals need to be replaced. This has reduced the unnecessary replacement of the seals and prevented downtime and cost.

► FIL 7800 – A380 Air Generation Unit Installation & Removal Trolley

Licensed Aerospace Tooling

Ground Support Equipment

Tier 1 Engine Tooling

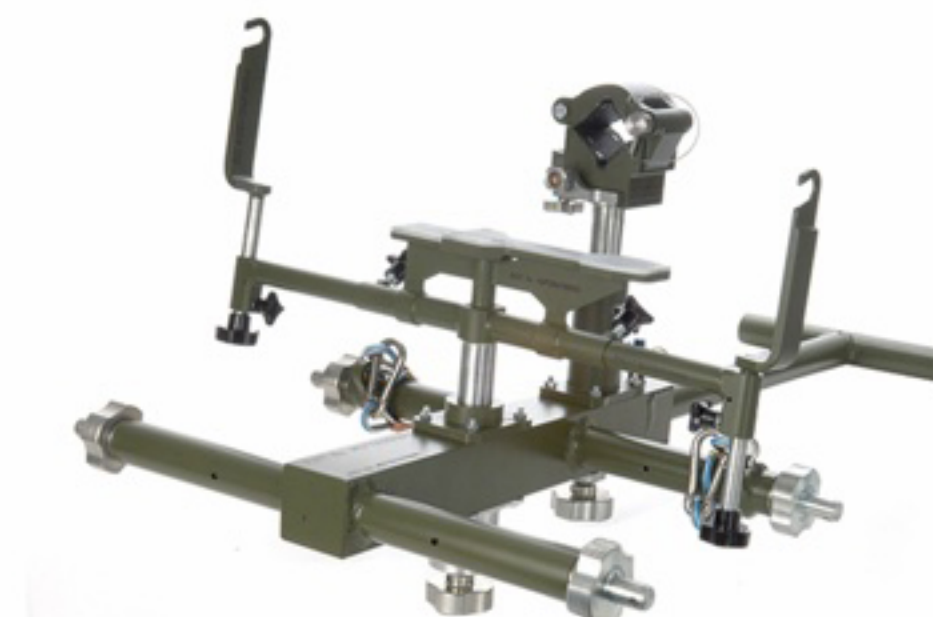

Designed and manufactured for the Aero Engine Corporation of China, for use in the removal and installation of the CJ1000

Tier 1 manufacturer for RH Aero, supporting the GEnx-1B and GEnx-2B engines.

Tier 1 manufacturer for RH Aero, supporting the removal, installation, and transportation of Trent 7000 engines.

Defence Components

Field International UK is proud to be one of the Tier 1 suppliers to BAE Systems and other international defence customers since 1995. Our core capabilities include in-house engineering design, manufacturing including welding, painting, hydraulic cleaning and vehicular / sub-system integration of combat support vehicles.

Engineered Solutions Design and Manufacturing

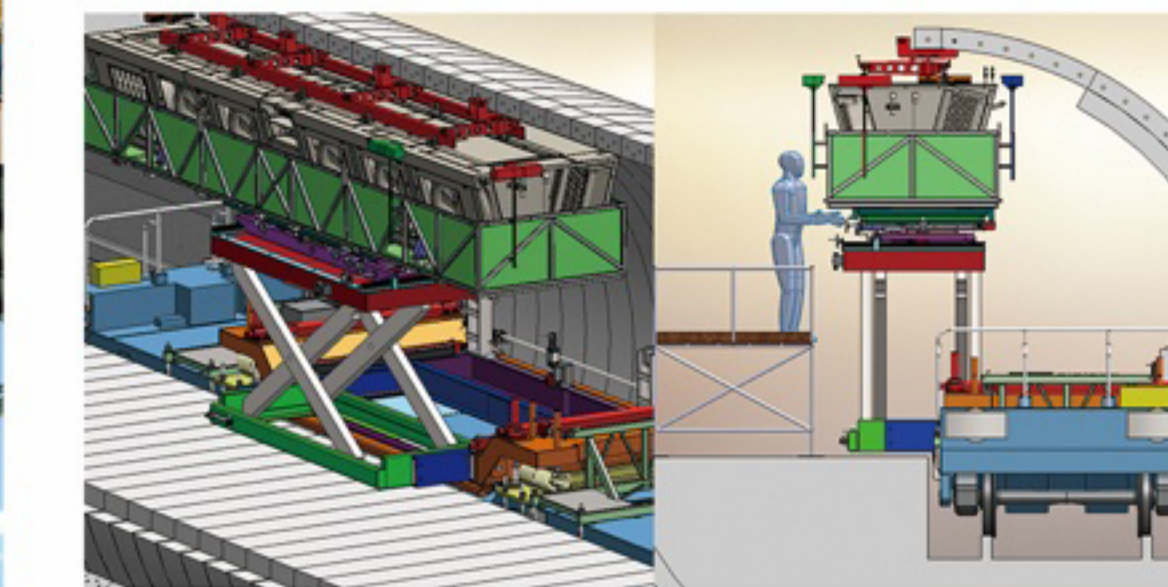

A400M Tooling Support Rudder Removal & Installation Tool.

Air Conditioning Unit Removal / Installation Tool.

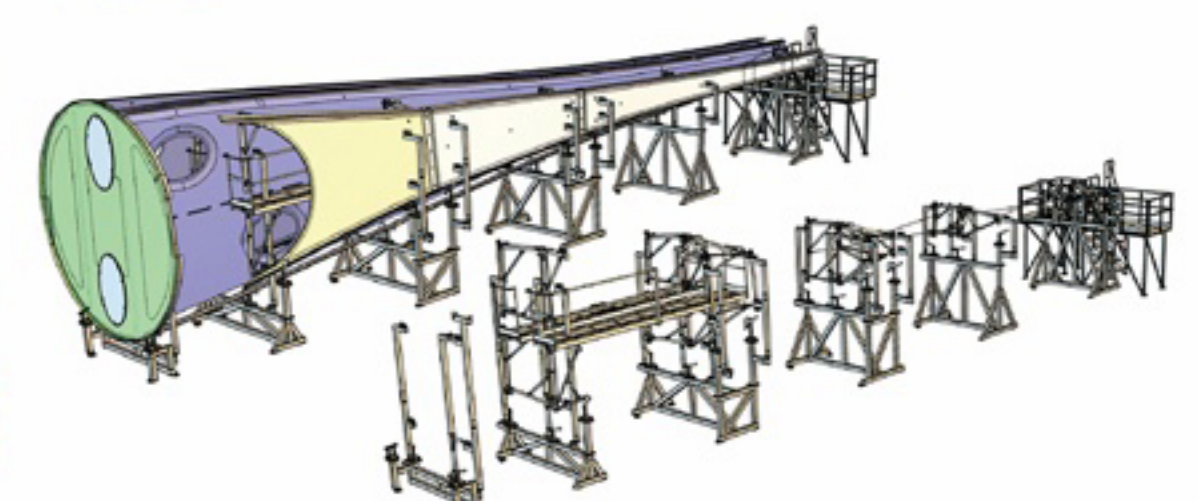

Beluga Door, Tooling Design, Manufacture & Installation into 1st Aircraft.

Vestas Design & Build Project

Assembly Jig, to position reinforcing Webs ready to assemble into 80m wind turbine blade.

Jig overview, loaded with Webs.

All Jig parts in relative positions, with end platform and intermediate walkways.

Aircraft weighing Services & Equipment

Certified global specialist in aircraft weighing services and equipment.

Global Distribution & Aftersales Servicing

Custom-built maintenance & painting docks, working platforms, access steps, and aerial work platforms for Aviation.

didsbury est.1941

Specified by Airbus, Boeing, Comac & Embraer and used by global airlines, Didsbury manufactures the world's safest aviation hoists.

DILLON

Dillon Dynamometers: The Gold Standard in Aviation MRO - Ensuring Safety & Accuracy at Every Altitude. Dillon Makes Load Testing Fast, Intuitive, and Reliable.

Manufacturing Capability

Approvals and Endorsements

BS EN 9100:2009, ISO9001:2008 & AS9100

- UK Cage Code K0697
- PTE Cage Code Q3629
- FIT Cage Code Q3657
- FME Cage Code 4FMLW
- INDIA Cage Code 6357Y

A few of our major OEM customers

- Airbus Defense & Space (Tier 1)
- Airbus Helicopters (Tier 1)
- BAE Systems (Tier 1)
- Boeing Aircraft Tooling Licensee
- COMAC
- Collins Aerospace
- Gulfstream Aerospace
- Lufthansa Technik
- Rolls-Royce
- Rolls-Royce Defence
- Safran

In addition to the OEM approvals we supply most if not all of the major Airlines and MRO's around the world with licensed aircraft tooling and GSE.
